# PRODUCTS PEOPLE LOVE™

Mice and Trackballs

Logitech is the world's largest manufacturer of mice and trackballs. We've been making pointing devices of uncompromising quality for more than a decade, and recently shipped our 100 millionth mouse. Get more done with our three-button MouseMan® and TrackMan® products and the included MouseWare® software. Cordless MouseMan Pro offers an innovative new shape, and, along with Cordless MouseMan 96 and MouseMan 96, provides HyperJump for Windows® 95. For convenient Internet surfing, try SurfMan™ with CyberJump™ software.

Joysticks

Logitech emerged as the worldwide market share leader for joysticks in 1995. Whether you thrive on air combat, or adventure games, or flight simulators, our WingMan® and WingMan® Extreme™ can help you play better. For first-person games such as Doom, Quake, and Duke Nukem 3D, only the new WingMan® Warrior combat machine offers 360⁰ SpinControl™ technology for getting out of tight spots.

Scanners

Logitech is also a leading name in imaging, with handheld and sheetfed scanners for home and office. Easily turn photos, line art, and text into electronic information you can use in applications. The new ScanMan® Color 2000 lets you create a world of great full-color projects, quickly and easily. PageScan™ Color gives you document management and the versatility of a flatbed scanner in one compact sheetfed scanner. The new PageScan™ Color Pro with ADF combines multifunctionality with enhanced scanning power and ease.

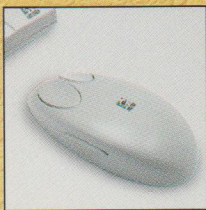

Cordless MouseMan® Pro   NEW!

- Innovative shape provides an alternative for right-handed users
- Advanced radio technology frees you to work in a 6-foot range
- Three programmable buttons including thumb button, MouseWare® software, HyperJump for Windows® 95
- Four separate channels allow the use of multiple mice in an area
- Runs on 2 standard AAA batteries; energy-saving sleep mode extends battery life
- Works with Windows® 95, Windows® 3.1 and DOS
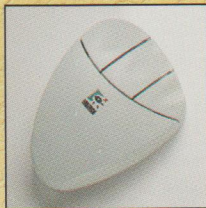

Cordless MouseMan® 96

- Advanced radio technology frees you to work in a 6-foot range
- HyperJump feature for Windows® 95: instant access to 8 windows management commands
- Three programmable buttons, and MouseWare® software
- Four separate channels allow the use of multiple mice in an area
- Runs on 2 standard AAA batteries; energy-saving sleep mode extends battery life
- Optimized for Windows® 95; works with Windows® 3.1 and DOS. Macintosh® version available
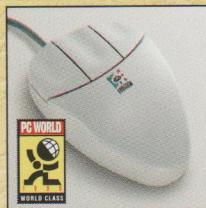

MouseMan® 96

- Wider at the top and narrower at the bottom, it nestles in your palm
- HyperJump feature for Windows® 95: instant access to 8 windows management commands
- Offers smooth cursor movement and superior precision
- Design features heavy ball, buttons with finger grooves and a unique thumb indentation
- Three programmable buttons and MouseWare® software
- Optimized for Windows® 95, also works with Windows® 3.1 and DOS.
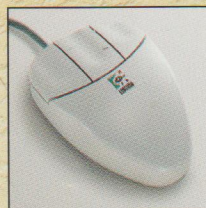

MouseMan®

- Wider at the top and narrower at the bottom, it nestles in your palm
- Offers smooth cursor movement and superior precision
- Design features heavy ball, buttons with finger grooves and a unique thumb indentation
- Three programmable buttons and MouseWare® software
- Windows® 95 compatible

MouseMan® Bus Mouse

- No need to set jumpers with innovative serial bus board
- Plug and Play compatible– Windows® 95 automatically recognizes and configures the board
- Includes software configuration utility for Windows® 3.1 and DOS
- Provides the same design advantages as non-boarded MouseMan
- Leaves your serial port free for other devices
- Windows® 95 compatible

First Mouse™

- Unbeatable value and ease of use
- Updated design
- Just right for home or office
- Easy to install
- Windows® 95 compatible

WingMan® Warrior   NEW!

- Double-fisted combat machine with optical precision for first-person 3D games
- Endorsed by John Romero, creator of Doom
- Features unique 360-degree SpinControl™ technology
- Independent aiming and navigation with digital serial port interface
- Also works as a WingMan® Extreme™ joystick for standard joystick games
- Windows® 95 compatible

WingMan® Extreme™

- Designed for high-powered games and flight simulators
- Four-way view switch provides 360-degree perspective
- Works as a 2- or 4-button joystick
- Quick-action trigger and rubber encased buttons offer fast, accurate fire power
- Built to take abuse with solid construction and a heavy stable base
- Windows® 95 compatible
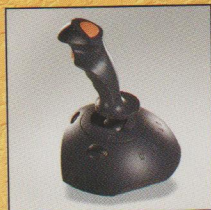

WingMan®

- Built for flying meaner, harder and faster
- Throttle control responds instantly to bring more power to your action
- Rubber encased buttons enhance firing accuracy
- Built to take abuse with solid construction and a heavy stable base
- Seven-foot cable easily reaches your computer
- Windows® 95 compatible

WingMan® Light NEW!

- Comfortable design
- Autofire button
- Strong suction cup adherence
- Superior quality at an affordable price
- Six-foot cable gives you room to play
- Windows® 95 compatible
